What's my number?

Purpose:

- To practice addition basic facts using three numbers.

You need:

- 3 dice
- Two or more players

How to play:

- 1 player holds 3 dice.
- The others turn their backs as player one rolls the dice and adds each dice together e.g. 2 + 3 + 6.
- Player one removes one dice.
- The group turns back to face player one who tells them the sum of the three dice, e.g. 11 (the total of 2 + 3 + 6).
- The other players have to work out what the missing number is.

Variations:

- You could use 4 dice.
- You could multiply the numbers together instead of adding.
- You could use 2 dice and add or multiply.
