

Write three true statements about human bodies using the information on the body analyser.

Here's an example:

There is far more oxygen in our bodies than any other element.

2. The inhabitants of Zerkon are made up of $\frac{1}{3}$ oxygen, $\frac{1}{6}$ hydrogen, $\frac{1}{12}$ carbon and other elements, $\frac{1}{4}$ silicon, and $\frac{1}{6}$ calcium.

 a. Copy and complete the body analyser for an inhabitant of Zerkon.

b. Write three true statements about the body of an inhabitant of Zerkon.

c. What fraction of a Zerkonian body is not calcium? Express your answer in the simplest fraction.

Activity Two

There are five teams in Pool A of the intergalactic rugby tournament: Earth, Zerkon, Pheon, Ngore, and Gangag.

In the first round, every team must play every other team once.

How many games will there be in the first round?

Activity Three

1. Use the information in the table below to draw pictures of the contestants from Pool A of the intergalactic rugby tournament. The first two are shown in the illustrations.

Pool A			
	Heads	Arms	Legs
Earth	1	2	2
Zerkon	1	4	4
Pheon	3	4	1
Ngore	2	0	8
Gangag	5	3	2

2. The contestants in Pool B of the rugby tournament are from Myon, Disopo, Arnell, Kuzon, and Ranosh. With a classmate, imagine what the contestants from these five planets look like and then draw them. Give your pictures to two other classmates to fill in a table showing the number of heads, arms, and legs they have.
