What's My Number?

**You need** ☑ a thousands chart   ☑ a classmate

Activity

Levi used a thousands chart to find out how far it is from 12 to 35.

2	3	4	5
12	13	14	15
22	23	24	25
32	33	34	35

10↘   10↘

1   1   1

> I know that
> 12 + 10 + 10 = 32.
> That's a jump of 20.
> 32 + 1 + 1 + 1 = 35.
> That's a jump of 3.
> 20 + 3 = 23.

Then Levi wrote the number story: 12 + 23 = 35

1. Use the thousands chart to help you find how far it is between the numbers below.
Can you take more than one path?
Write the number story for each question.

a. 161 and 193   **b.** 155 and 200

c. 235 and 389   **d.** 507 and 823

e. 479 and 436   **f.** 853 and 438

2. Make up some number story problems for a classmate to solve.
Make sure that you know the answers before you ask your classmate to solve them.
