

## This is to That

1. Bobby has red squares, yellow squares and green squares. The ratio of red to yellow squares is 2:1 and the ratio of yellow to green squares is 3:1. What is the ratio of red to green squares?  
Colour in the squares below if it helps. How can you check your answer?
2. Repeat the question if both ratios are 3:1?
3. What if the ratio of red to yellow squares is 4:1 and the ratio of yellow to green squares is 2:1. What is the ratio of red to green squares?
