

Cereal Creator

You need:

- ingredients for your cereal
- kitchen measuring cups and measuring spoons
- bowls and spoons to mix your cereal
- paper and pencil to write down your recipe

What to do:

1. Think about the cereal you would like to create.
Which ingredients do you want the most of?
Which do you want the least of?
2. Measure the ingredients you want into your bowl and mix them up; as you work write down how much of each ingredient you are using.
3. When you are finished write down your recipe so others could make your cereal if they would like to. Remember to include a list of ingredients and a set of instructions as well as a good name for your cereal.
