

Addition Bingo

Purpose:

You can help your child to remember addition basic facts up to $10 + 10$.

What you need:

- A set of Bingo cards and questions - you can print these or make your own.
- 6 counters for each player – buttons, bottle tops, pebbles or shells

What to do:

Cut out the bingo question cards and place in a pile face down.

Give a bingo card to each player.

Players take turns to take a bingo question, and read it out loud. Players answer the question out loud.

Encourage your children to answer the question as quickly as they can.

Players who have the answer on their bingo board can cover it with a counter.

The winner is the first person to cover all the numbers on their bingo card and call out “Bingo!”

What to expect your child to do:

To answer the addition questions quickly. They should progress to instantly recalling the answer.

Variation:

- Swap bingo cards and play again.
- Have a “caller” who reads all the bingo questions.
- Players can only cover the number on their bingo board if they are the first to answer the bingo question.
- Play “Bingo” games using your home languages.
