

Domino Pairs to 100

Purpose:

You can help your child to recall pairs to 100

What you need:

Set of 20 Domino Cards. You can print these or make your own.

What to do:

Cut out the 20 domino cards.

Deal three domino cards to each player. Place one domino face up between the two players and the remaining cards in a pile face down. Players take turns to match of their domino cards to the cards in the middle. Players match the two numbers that add to 100.

For example:

	95	5	10	90	
--	----	---	----	----	--

The next player can now match to either the 5 or the 10. Pick up from the face down pile if you do not have a domino to add to the line. The winner is the first player to use all their domino cards.

What to expect your child to do:

To recall the pairs of numbers that add to 100.

Variation:

- Children can take all the cards and arrange them so the ends match to form one continuous line.
- You can use the dominoes to call out numbers for your child to respond with the number that adds to 100.
- Make another set of domino cards using different numbers.
- Play this game using your home languages.
