

Books vs bean bags: Part 1

A school is going to upgrade the school library.

Students say that this is a great opportunity to find out how that money should be spent. Teachers suggest lots of shiny new books.

However, the students think that bean bags, comfy seating, e-readers, and fast internet are much more important buys for the school library.

The class decides, “Let’s find out how people use a library. Then we can use our data to make suggestions to the B.O.T. about the school library.”

Pose an investigation question and construct a survey to conduct amongst the school community. You need to include students, teachers, and parents as they all have an interest in how the library is used.
