

Addition Loopy Cards

Why do it?

You can help your child to remember the addition basic facts up to $10 + 10$.

What you need:

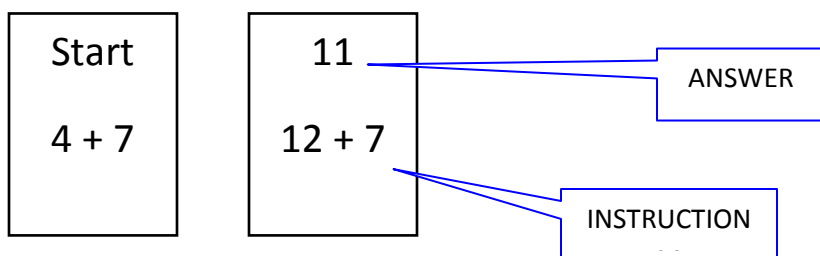

A set of Addition Loopy Cards. Print the cards and cut them out.

What to do:

Deal out the cards between the players. Players can spread their cards out face up.

The person who has "Start" loopy card begins by reading out loud the instruction on that card, " $4 + 7$ " and then places the card in the middle.

The person who has a Loopy card that has the answer " 11 " calls out the answer and places it on top of the start card. The player then reads the next instruction.

The game keeps going until the card with "Finish" is placed in the middle.

What to expect your child to do:

- To recall the addition basic facts. They should become quicker at instantly recalling the facts.

Variation:

Make up more sets of Loopy cards.

Make a note of the addition basic facts that your child needs to practice most.

Players can match the answers and instructions to form one continuous line.

Play the Subtraction Loopy Card activity

Addition Loopy Cards

Start $4 + 7$	11 $12 + 7$	19 $4 + 6$	10 $11 + 6$	17 $7 + 5$
12 $5 + 3$	8 $7 + 8$	15 $9 + 4$	13 $4 + 3$	7 $15 + 5$
20 $2 + 4$	6 $7 + 2$	9 $13 + 5$	18 $8 + 6$	14 Finish
