

Calculator Challenge

Purpose:

The purpose of this activity is to help your child learn decimal numbers that add to make one.

Link to the Number Framework:

Number Facts, Stage 6.

What to do:

Use a calculator to play the calculator challenge.

- Enter a number with 2 decimal places into the calculator. For example: 0.83.
- Challenge the other player to make the number into one using just one other number. In the above example the child needs to enter “+ 0.17 =” to make one.
- Take turns entering numbers and completing the challenge using many different decimal numbers.
