

Division Puzzle

Why do it?

You can help your child to remember the division basic facts.

What you need:

Puzzle board. You can print this or make your own.

What to do:

Cut out the puzzle and give all nine pieces to your child.

Arrange the pieces back into the 3 by 3 grid so that sides of the touching pieces match. For example, $8 \div 8$ needs to match 1.

Tell your child that when the puzzle is complete none of the pieces will be orientated so the numbers are upside down.

You may like to give the hint that the piece with 2 blank sides can go in the top left corner of the puzzle.

What to expect your child to do:

- To use their division basic facts to solve the puzzle.

Variation:

Make your own puzzle.

Division Puzzle

$25 \div 5$ $8 \div 8$	0 $60 \div 6$ $4 \div 4$	1 $21 \div 3$ $24 \div 2$
5 $42 \div 7$ $12 \div 6$ 5	2 $24 \div 8$ 10 $28 \div 4$	7 $20 \div 5$ 7 $30 \div 6$
6 $55 \div 5$ $15 \div 5$ 6	3 $72 \div 9$ 3 $36 \div 9$	4 $54 \div 6$ 4 $48 \div 8$
