

Greatest number to 100

Why do this?

To help your child practice ordering numbers to 100.

What you need:

A pack of playing cards (Ace = 1, Jack = 0)
Paper and pencil to keep score

What to do:

Place the cards in a pile face down between the players.

Each player selects two cards and arranges them to make the largest two digit number.

For example 5 and 2 can be arranged as 52 or 25.

Ask your child to read the numbers. Which number is the biggest?

The player with the largest number wins a point. The winner is the first player to win 5 points. The cards are placed at the bottom of the pile.

What to expect your child to do:

- To read the two digit numbers and recognise the biggest number.

Variation:

The aim can be to make the smallest two digit number.

Ask your child: *How many tens are in each number? Which number is closest to 50?*
