

## Halves of Hundreds Numbers

### Purpose:

The purpose of this activity is to help your child to learn halves of hundreds numbers to 1000. For example half of 500 is 250, half of 700 is 350.

### Link to Number Framework:

Number facts, Stage 5.

### What you need:

- Game cards. You can print these or make your own. Put a dot on the back of the answer cards so these can easily be matched with the halves facts.

### What to do:

Use the halves of hundreds cards to play memory. The aim of the game is to find as many matching pairs as possible by remembering where the cards are.

- Spread out all the cards face down.
- Turn over 2 cards. If the cards match, for example " $\frac{1}{2}$  of 500" and "250" players get to keep the pair. If the cards don't match, players replace them face down.
- Take turns to try and find a matching pair.
- The winner is the player with the most pairs at the end of the game.

Have many pairs can you get?

### What to expect your child to do:

Make links between the hundreds numbers and their corresponding halves, and develop instant recall of this knowledge.

### Related Māori vocab:

half	haurua
double	rearua
matching cards	kāri taurite
