

High Flyers

You need square tiles or multilink cubes (optional)
 a calculator (optional)

Activity

1. The seats on an aeroplane are set out like this:

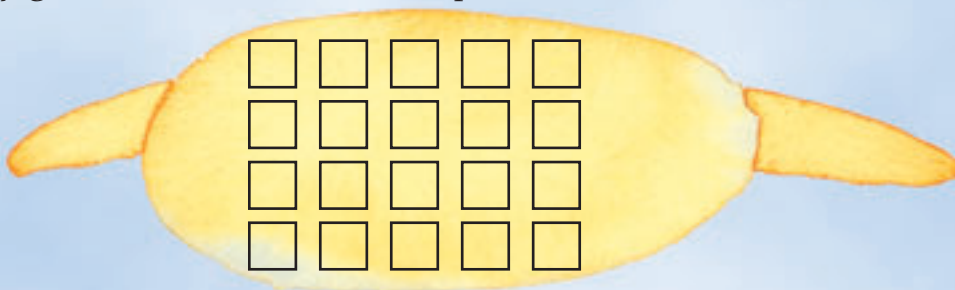

How many seats are on the aeroplane?

The factory that makes the aeroplane tried other ways of setting out the seats. This way gave them a long, thin aeroplane:

This way gave them a short, fat aeroplane:

Now they want a plan for a bigger aeroplane with 60 seats.

2. Draw some plans for them.
 3. Which plan do you think is the best?
 Why?
