

# Pathways

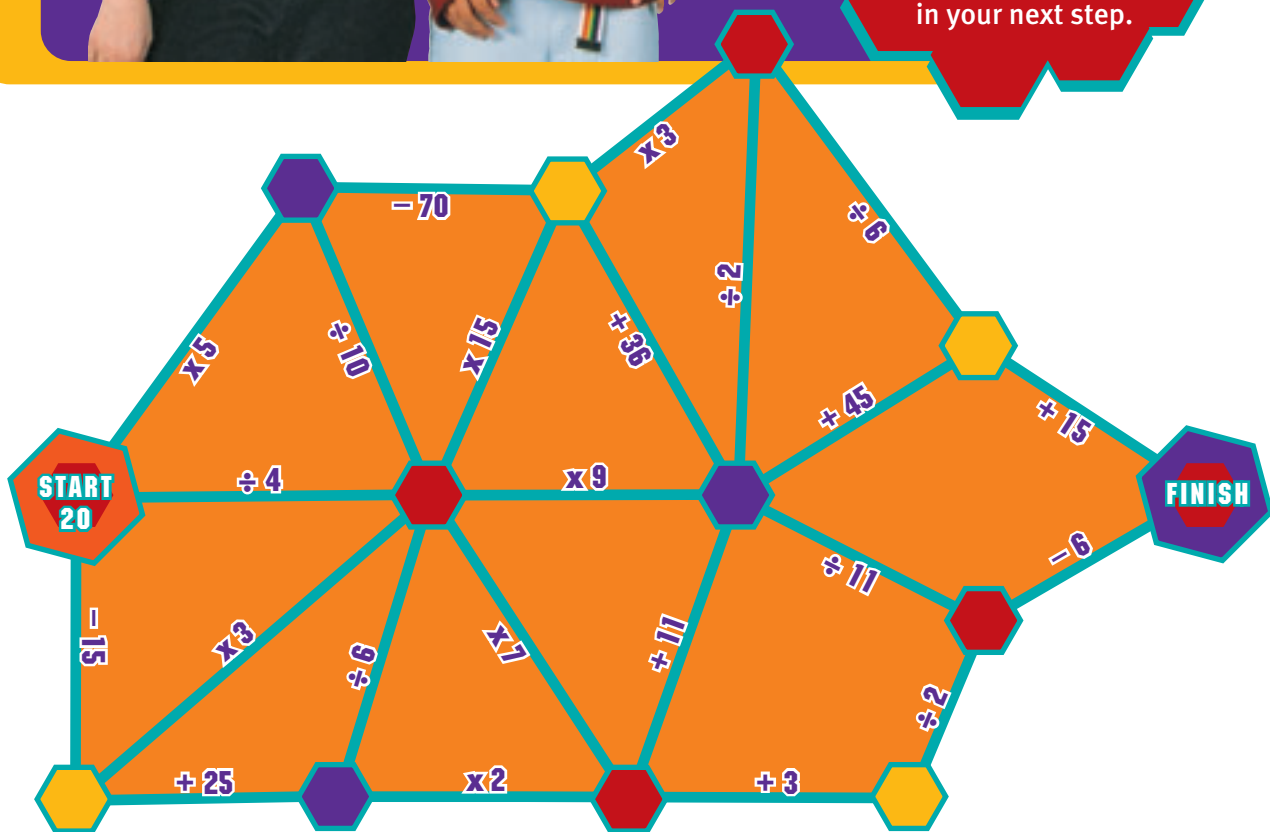

You need: a classmate

ACTIVITY

## METHOD:

Begin at the start number and use it to follow any pathway that leads up or down or horizontally to the right. You can't go horizontally to the left. Use each answer in your next step.

- Find pathways to equal the following numbers at the finish:
 

a. 246	b. 105	c. 0
d. 13	e. 171	f. 48
g. 141		
- Write some totals for a classmate to find. Make sure you know a possible pathway that will lead to each total.
- Make up a pathways diagram and some finishing numbers for a classmate to try. Make sure you have at least one possible pathway for each finishing number.
