

Standing Order

Three friends measured their heights:

- Jayne is one and a half metres tall.
- Chris is 1.6 metres tall.
- Amy is 1 m 58 cm tall.

Who is the tallest and who is the shortest?
Show how you know.

1. Are these heights ready to compare?
2. What form should they be in, so that they can be compared?
3. Who is the tallest and who is the shortest?
