

Standing Order

Three friends measured their heights:

- Jayne is one and a half metres tall.
- Chris is 1.6 metres tall.
- Amy is 1 m 58 cm tall.

Who is the tallest and who is the shortest?
Show how you know.

1. What can you use to measure someone's height?
2. Where would each of these three friends be on that measuring tool?
3. Who is the tallest and who is the shortest?
