

Standing Room Only

Activity

Pani, Mereana, and Arihia went to a kapahaka competition held at Te Whare Hakinakina. Each of them estimated the number of people the stadium could hold.

I counted 12 sections.
Each section has 4
blocks of seats.

There are 30 rows
in each block.

Each row has 20
seats in it.

Pani

Arihia

Mereana

Pani thinks the stadium holds 20 000 people. Arihia thinks it holds 40 000, and Mereana thinks it holds 35 000.

1. Work out the number of people who could fit in the stadium.
2. Whose estimate is the closest?
