

Under the Waves

Activity

1. Stacey Starfish lives with her family on the ocean floor. In her ocean village, there are four families and 20 starfish. Stacey's family has twice as many starfish as each of the other families. How many starfish are in Stacey's family?

2. Michael Moray Eel is 60 centimetres long. Michael's big brother is twice as long as him, and his little sister is half as long as Michael. How much longer is Michael's big brother than his little sister?

3. Dipak the Dolphin goes to school under the sea. Half of Dipak's class are dolphins. A quarter of his class are sea horses, and the rest are sea snails.

If there are 32 students in Dipak's class, how many dolphins, sea horses, and sea snails are there?

4. Mandy and Manu go diving. They find a big shipwreck with more than four cabins in it. There are the same number of sea creatures in each cabin. Altogether, Mandy counts 27 sea creatures. How many cabins are there?
