

# Wanted!

You need  removable stickers  a ruler  scales  a classmate

## Activity One

Think of your classroom whiteboard duster. Describe the duster without drawing it. Some things that you could look at are the length of the duster, its mass, and its colour.

Maire has made up a special sheet that she uses to describe things in her classroom. Draw up your own sheet like Maire's and fill it in with your description of the duster.

Now make up another sheet and fill it in with the details of another object in your classroom. Put a removable sticker over the object name. Ask a classmate to work out what your object is.

Mass \_\_\_\_\_

Length \_\_\_\_\_

Height \_\_\_\_\_

Width \_\_\_\_\_

Colour \_\_\_\_\_

## Activity Two

Tama's uncle lives in Hong Kong. He wants to send Tama a Christmas present. Tama can choose his own present, but he must send his uncle a description of the present he wants so that he can be sure his uncle gets him the right thing.

Think of a present that Tama could ask his uncle to send him. Write down an accurate description of the present. Include length, mass, and anything else you can think of that will make it easy for Tama's uncle to find exactly what you are describing.
