

# Where on Earth?

**You need:** ★ a computer graphing program (optional)      ★ a classmate

## Activity

Room 4 are investigating what countries different family members were born in.

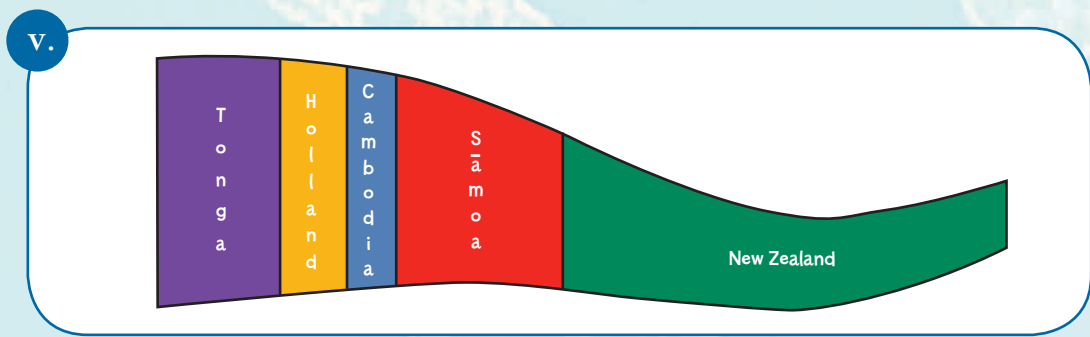

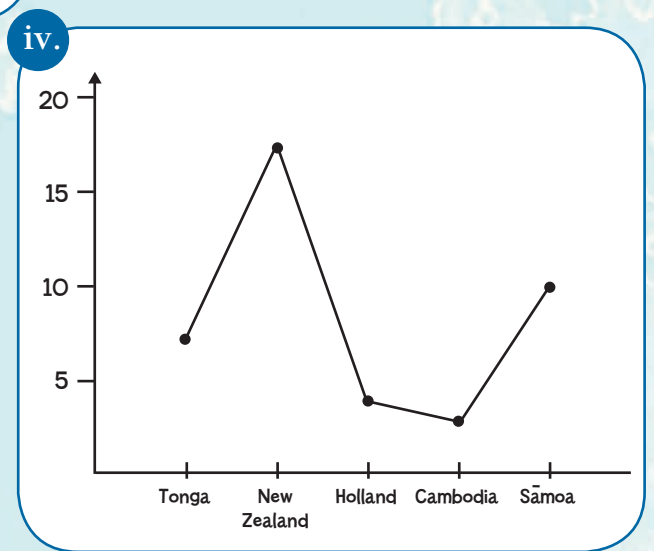

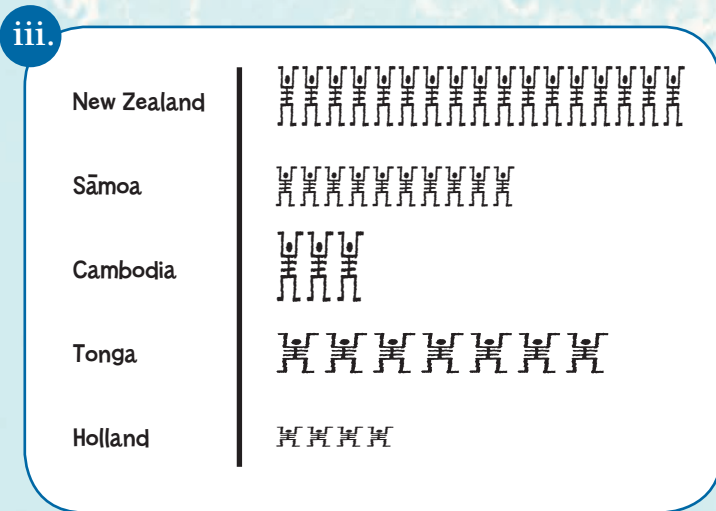

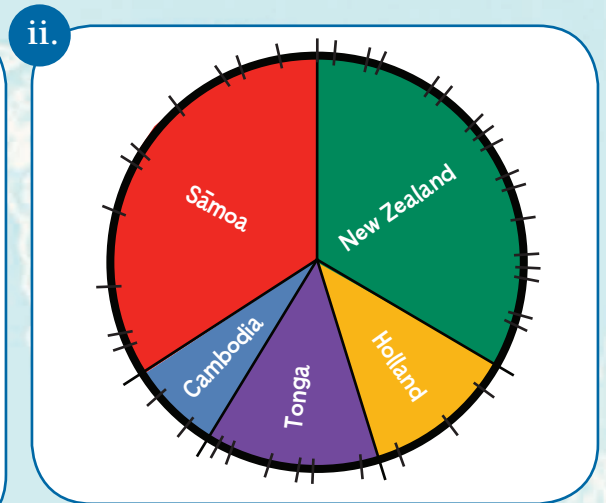

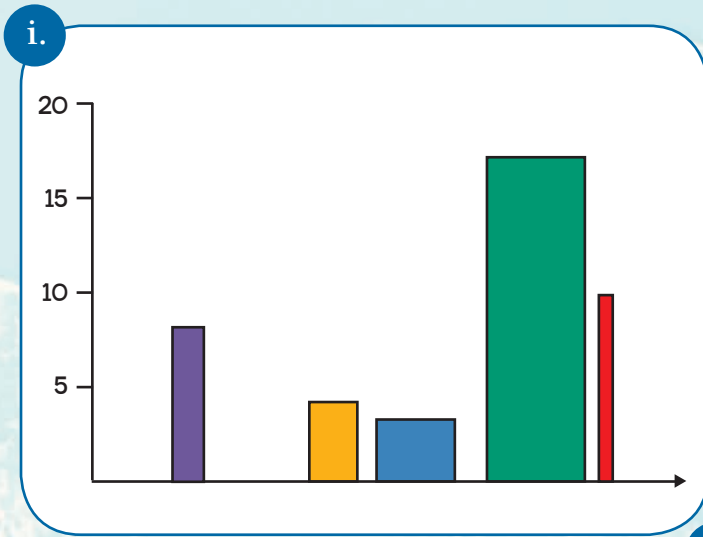

They write their findings in a tally chart like this (|||| means 5):

Country of birth	Number of family members
Tonga	
New Zealand	
Holland (Netherlands)	
Cambodia	
Sāmoa	

Here are some graphs the students draw to show this data.

1. Suggest how they could be improved.

2. Find out about the birthplaces of the family members of your classmates. Draw a graph of your results. Compare your graph with a classmate's. Discuss what your graphs show you.

**Focus** Creating graphs that communicate effectively
