

Getting partial to decimals: Decimal differences

For each person find the length of the unmeasured part of their body.

Getting partial to decimals: Decimal differences

For each pair of people find the difference in their heights.

This photograph was taken in Egypt when the world's tallest man, Sultan Kösen, met the world's shortest woman, Jyoti Amge.

The difference in their heights was an amazing 1.88m.

What might the heights of the two people be?

Give three reasonable answers then check your estimates online.
